

BRB (BrainrotBlocker)

Step-by-step guide on how to use BRB as a chrome extension

1. Download the file

2. Unzip the file

3. Go to Extensions and turn on developer mode. Then, press Load Unpacked on the top left side

4. Choose the file **brainrot-blocker**
5. Pin it
6. Test it on a YouTube video with the keywords like **alpha** or **skibidi** but refresh that first video to ensure that it has activated. You will see that it have been activated because it redirects to another video or another link
7. Open the extension to see the settings
8. You can add keywords to be avoided by someone watching a video with that word in it and then direct them to any link by adding it through the extension
